SmartThings

Broaden Eco-system

While the SmartThings App is compatible with various Wi-Fi products, adding the SmartThings Hub allows you to control Zigbee and Z-Wave* products as well, giving you greater control over your home.

Wirelessly Connect Your Hub

With wireless connectivity, the SmartThings Hub can be stored anywhere in your home as long as there is a power outlet and wireless connection. This allows you to place it in the optimal position and avoid clutter near your internet router.

Consolidate Your Hubs

The SmartThings Hub is compatible across a wide range of devices and brands, eliminating the need to buy multiple hubs.

*Z-Wave and Zigbee Plus are registered trademarks of Silicon Laboratories and its subsidiaries in the United States and other countries.
