The Perfect EV Charging Package *for your home*

Our chargers are compatible with all EV models, powered by intelligent software, and installed and serviced by certified professionals. **Nothing but the best is good enough for our customers.** A state-of-the-art product that matches the needs and expectations for fast, safe, and efficient charging solutions by **Siemens Canada.**

Since 1847, Siemens has been an Award-Winning Electric Company; its 3rd Generation VersiCharge AC is distinguished as a premium level 2 smart charger due to continuous technological innovations. For over a decade, VersiCharge chargers have stood for superior quality, ruggedness, proven technology.

Hwisel is proud to install the New 3rd-Generation VersiCharge AC charger with numerous groundbreaking enhancements, a fresh and appealing design, and up to 11.5 kW of AC (alternating current) charging power.

One Plan includes everything you need.

Why you should consider an EV Charger Subscription ...

- No upfront capital cost
- No equipment risk
- No service costs
- No installation costs
- No management responsibility

Hwisel brings years of IoT experience to enable:

- Smart Charging
- Load management
- Grid optimization
- System notifications
- Reminders
- On Demand Service

Charge effortlessly at home

...convenient

Enjoy the convenience of charging at home without waiting on public chargers, head out ... fully charged, ready to go, every time.

We supply a high quality charger and cover the cost of standard installation.

...more than a charger

Plug, charge, and drive... Leave the rest to us!

Service

An EV Charger employs both hardware and software to deliver a proper charge to the vehicle. **Included in your Plan is complimentary Service.** Coverage includes software faults, software upgrades, hardware repair, including parts, with our exclusive **Swap Out Charger Program.** Service calls may be initiated by us or you, the customer. **We provide the convenient Hwisel Service App.**

Installation

We'll make sure the installation is handled by a **Certified EV Charger Electrician** who is also a licensed, insured contractor to do the work. Standard installation at no extra charge covers labour, materials, and permit.

Management

Your charger will be connected to our cloud-based network. This allows us to always monitor the charger. Using our exclusive **H.E.L.M. (Hwisel Electric Load Management) System** we can deliver **Smart Charging** while helping you avoid costly service panel upgrades.

Hardware

The charger is an essential appliance in your home. To deliver the service you expect, Hwisel only installs brand name equipment from established manufacturers. We stand behind the charger, so we take no shortcuts on quality.

Our Swap Out service demands that we standardize so you will always receive a premium product.

If you are not 100% satisfied we will remove the charger, simply pay for the installation and purchase a charger from your preferred vendor.

...safety first

Secure safe monitoring and management of your charger is also included. We will install a complimentary Smoke Detector and Fire Extinguisher in your garage for additional protection.

Charge up to eight times faster than a regular outlet with the safest method for your vehicle and home.

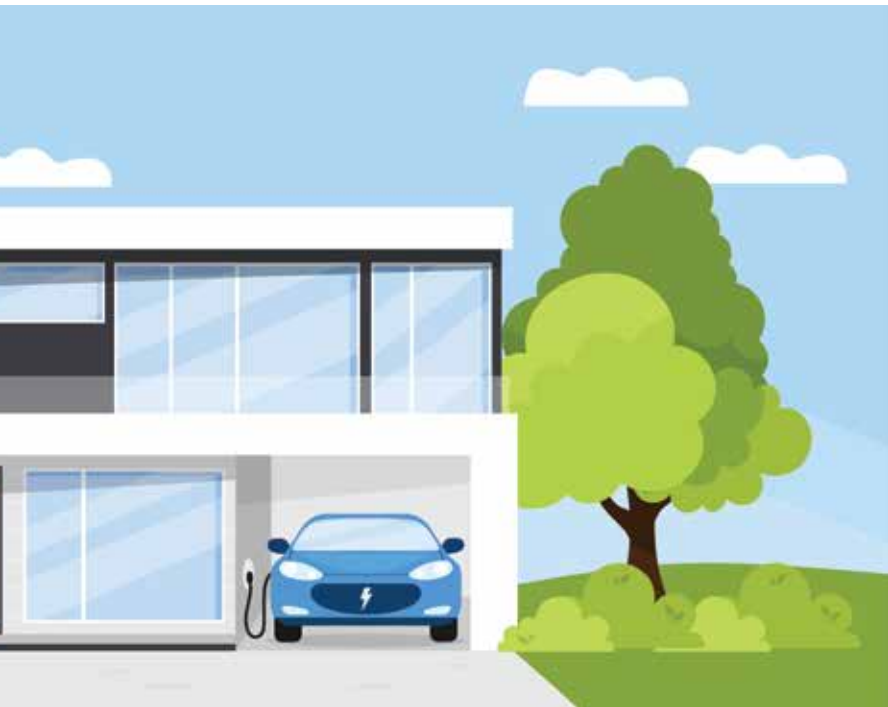

Safe and Easy to Use

How it works...

We are here with you every step of the way from the first call and beyond.

Simply, we take care of everything

...from selecting the charger, to installation, to ongoing support and service. **We even cover the electrical permit costs!** Some conditions may apply based on your unique requirements – contact us to find out.
